If you need this information in another language
or in an alternate format, contact MVBCN.

NEW SOLUTIONS uses a Child and Family Team to design unique services with each child and family.

The Team

- Supports the family in getting the help they need to succeed as parents once the formal Team is no longer needed.
- Is made up of people chosen by the family.
- Works with family strengths.
- Finds effective solutions that fit the family and child.

Want to know more?

Each of the 5 MVBCN counties has local Care Coordination staff, located in the county mental health program

For free:

Who is Eligible?
Children and youth whose mental health needs have not been met through usual services, and their families

Eligibility Screening Includes

Signed consent from parent or guardian before the screening

Telephone interviews with people who know the child's situation well

Review of a recent mental health assessment report

Completion of the CASII*, a survey to help pinpoint mental health needs

Assessment of other risk factors. These include risk of out of home placement, family stress, and school disruption.

*Child and Adolescent Service Intensity Instrument

Oregon Health Plan children can receive other new community-based and flexible supports.

Some children may need treatment in a hospital or in a residential or day treatment program. For these to be paid for with public funds, the same screening and Team planning apply.
